

# Field Report

## **General Impression of my research study abroad:**

On the academic front it was a very enlighten experience as I got to know and learn new concepts, research approaches and use some of them in my thesis implementation. Otherwise with its diversity and acceptance USA has been a wonderful country to stay in.

## **Quality of the host institution:**

Louisiana State University has one of the best campus environment I have seen so far. Both the administration and the department of geography were very welcoming and helpful. All the resources required to do my research were available and the library was very good too.

## **Contacts within the host institution, inclusion in the organization:**

- Dr. Micheal Leitner
- Mrs. Elizabeth R Honeycutt
- Ms. Loveness Schafer
- Mrs. Janice L Goodloe

## **Recommendations for future Marshall Plan students and fellows:**

Plan your stay before travelling to the USA i.e., your stay and travel arrangements as well as your research workflow with timeframe. Explore your host university and the country as it broadens your knowledge and gives invaluable experience.

## **Contact E-mail after completion of research stay:**
